## TEST ACCORDING TO EN ISO 374-1:2016+A1:2018/ EN ISO 374-4:2019

Tested chemical	Permeation level	Degradation %
A: METHANOL (CAS NUMBER 67-56-1)	2	15,5
K: SODIUM HYDROXIDE 40% (CAS NUMBER 1310-73-2)	6	-6,8
L: SULPHURIC ACID 96% (CAS NUMBER 7664-93-9)	4	21,0
M: NITRIC ACID 65% (CAS NUMBER 7697-37-2)	6	18,4
N: ACETIC ACID 99% (CAS NUMBER 64-19-7)	3	23,4
P: HYDROGEN PEROXIDE 30% (CAS NUMBER 7722-84-1)	6	3,4
S: HYDROFLUORIC ACID 40% (CAS NUMBER 7664-39-3)	6	X
T: FORMALDEHYDE 37% (CAS NUMBER 50-00-0)	6	8,1

## INSTRUCTIONS FOR USE - CATEGORY III SEE FRONT PAGE FOR PRODUCT SPECIFIC INFORMATION

Carefully read these instructions before using this product.  
DECLARATION OF CONFORMITY [www.ejendals.com/conformity](http://www.ejendals.com/conformity)

EXPLANATION OF PICTOGRAMS 0 - Below is the permeation level for the given individual hazard X. Not submitted to the test or test method not suitable for the glove design or material  
Warning! This product is designed to provide protection specified in PPE Regulation (EU) 2016/425 and PPE Regulation 2016/425 as amended and brought into UK law with the detailed levels of performance present below. However, always remember that no item of PPE can provide full protection and certain steps always be taken when exposed to hazardous chemicals or other high risk situations. The performance of this product is based on how it can protect against the different types of protection in the workplace due to other factors influencing the performance such as temperature, abrasion, degradation, etc.

EN ISO 374-1:2016+A1:2018 Protective gloves against dangerous chemicals and microorganisms - Part 1: Terminology and performance requirements for chemical risks. EN ISO 374-1:2016+A1:2018:2016-01-01  
TYPE A, B, C

Protective gloves against dangerous chemicals and microorganisms - Part 1: Terminology and performance requirements for chemical risks. EN ISO 374-1:2016+A1:2018:2016-01-01  
Type A - Level 2 for 4 chemicals, Type C - Level 4 for 1 chemical  
Permeation level 1 2 3 4 5 6  
Penetration break-through times (min) >10 >30 >60 >120 >240 >480  
E. Carbonyl fluoride  
F. Carbon dioxide  
G. Diethylamine  
H. Tetrahydrofuran  
I. Ammonium hydroxide 25%  
J. Hydrogen peroxide 30%  
K. Sodium hydroxide 40%  
L. Sulphuric acid 96%  
M. Nitric acid 65%  
N. Acetic acid 99%  
O. Formaldehyde 37%  
P. Toluene  
Q. Ethyl acetate

Warning: EN ISO 374-1:2016+A1:2018 This information does not reflect the actual duration of protection in the workplace or the differentiation between mixtures and pure chemicals. The chemical resistance has been assessed under laboratory conditions from samples taken from the palm only and relates only to the chemical tested. It can be different if used in a mixture. It is recommended to check that the glove is suitable for the mixture since the chemical resistance of the glove may differ from the type test depending on temperature, abrasion and degradation. When using protective gloves it is important to take into account serious chemical change to physical properties. Movements, snagging, rubbing, degradation caused by contact with the chemical etc. may reduce the actual use time significantly. For cosmetic chemicals, degradation can be the most important factor to consider when choosing chemical resistant gloves. Before usage inspect the gloves for any defect or imperfections. For single use only. Degradation is the percentage change in thickness.

EN ISO 374-5:2016 Protective gloves against dangerous chemicals and microorganisms - Part 5: Terminology and performance requirements for microorganism risks. Protection against virus, bacteria and fungi - Pass

Warning: EN ISO 374-5:2016 The penetration resistance has been assessed under laboratory conditions and relates only to the tested specimen.

### VIRUS / NOT TESTED AGAINST VIRUSES

EN 16523-1:2015+A1:2018 Determination of material resistance to permeation by chemicals - Part 1: Permeation by liquid chemical systems - Method of continuous contact.

EN 388:2016+A1:2018 Protective gloves against mechanical risks. Protection level 1-5  
A. Abrasion resistance Min. 0 Max. 5  
B. Blade cut resistance Min. 0 Max. 5  
C. Puncture resistance Min. 0 Max. 4  
D. Cut Resistance TDM Min. A Max. F  
E. Cut Resistance TDM Min. A Max. F  
F. Impact Protection P=Pass

SUITABLE FOR CONTACT WITH FOOD SPECIFIED IN REGULATION (EU) 10/2011 AND 1935/2004.

All gloves/sleeves that are suitable for foodstuff may not be suitable for all types of food. To know for which foodstuff the glove/sleeve may be used please see the Food declaration of conformity. Contact Ejendals for more information.

CONTAINERS:  
natural latex

EN ISO 21420:2020 PROTECTIVE GLOVES - GENERAL REQUIREMENTS AND TEST METHODS

Finger dexterity test: Min. 1; Max. 5

FITTING AND SIZING: All sizes comply with the EN ISO 21420:2020 for comfort, fit and dexterity, if not explained on the front page. If the short model system is suitable for the glove, the glove is suitable as a standard glove, in order to enhance the comfort for specific applications. Avoid tight fitting gloves. Use gloves that are not too loose or too tight will restrict movement and will not provide the optimal level of protection.

STORAGE AND TRANSPORT: Ideally stored in dry and dark condition in the original package, between +10° +30°C.

INSPECTION BEFORE USE: Check that the glove does not present holes, cracks, tears, colour change etc. If the product becomes damaged after use, do not use the product again. Never use a damaged product. Wear (or off) gloves one at a time. Replace gloves regularly for hygiene and the usage time should never exceed 8 h (note that some chemicals have a shorter permeation time). For more information contact Ejendals.

SHELF LIFE: 60 months.

CARE AND MAINTENANCE: Do not use any chemicals or sharp-edged objects for cleaning of gloves. Chemical gloves are not meant to be washed.

DISPOSAL: Gloves contaminated by chemicals must be disposed of in designated containers and disposed of according to local environmental legislation.

The glove contains natural rubber which may cause allergy.

ALLERGY: This product may contain components that may be a potential risk to allergic reactions. Do not use in case of hypersensitivity signs. For more information contact Ejendals.

LATEX FREE  YES  NO
